Peru & The Galapagos

The name Peru is derived from a Quechua Indian word meaning “Land of Abundance.” For the traveler, the name is especially fitting. High snow-covered Andean peaks contrast with lush rainforests, and the country is a treasure trove of archaeological wonders, including world-famous Machu Picchu.

North of Peru, off the coast of Ecuador, the Galapagos Islands were long a stopover for explorers, pirates and whalers. In 1835 they were visited by British naturalist Charles Darwin, who, pondering how each island hosted unique species, developed his Theory of Evolution.

The California Native proudly offers our series of special trips to Peru and the Galapagos, and we would love to have you join us.
